

## SOAPnote.org Cheat Sheet

Tag	Example(s)	Details
[text]	[text default="type here"] [text name="variable_1" memo="sample" default="type here" size=100]	Simple text box. Parameters: name, memo, default, size
[textarea]	[textarea name="variable_1" memo="sample" default="type here"] [textarea name="variable_2" memo="two lines" default="line1/nline2"] [textarea name="variable_3" memo="fillable" fillable="true" default="line1\nline2\n***line3****"]	Larger area for free text. Parameters: name, memo, cols, rows, default, fillable For multiple lines, use '\n'. For 'fillable' feature, use pairs of '****'
[date]	[date name="variable_1"] [date memo="enter date" default="today"] [date default="timestamp"]	Date field with calendar. Parameters: name, memo, default
[radio]	[radio name="variable_1" value="this that"]	Field where only one option may be chosen. Parameters: name, memo, value
[checkbox]	[checkbox value="option A option B option C"]	Field where multiple options may be chosen. Parameters: name, memo, value
[checkboxlist]	[checkboxlist value="option A option B option C"]	Field where multiple options may be chosen. Output has all options with [+] or [-] Parameters: name, memo, value
[select]	[select value="choice A choice B choice C"] [select value="A=1 B=2 C=3" memo="choose one"]	Field where only one option may be chosen. Parameters: name, memo, value
[comment]	[comment memo="comment 2" memo_color="lightgreen" memo_size="small" memo_style="italic"]	Text only displays in form, not in output. Parameters: memo, memo_color, memo_size, memo_style
[link]	[link url="https://www.soapnote.org" memo="SOAPnote Home"]	External or internal (see [mark]) links. Parameters: url, mark, memo
[mark]	[link memo="go to the mark" mark="target"] skip [mark name="target"]	This is the target for an internal link. Parameter: name
[organization] [address_line_1] [address_line_2] [city] [state] [postal_code] [phone] [fax] [website] [email]	Please call [phone] or email [email].	These are items saved in a user's profile that are pulled into the output. Parameters: none
[blurb_1] [blurb_2] [blurb_3]	[blurb_1] the night before your visit. [blurb_2] or park in the red lot.	Three extra items which are also saved in a user's profile. Parameters: none
[var]	Used to recall a variable in the output. Parameter: name Variable names can't contain spaces.	[text default="biz" name="variable_1"] [var name="variable_1"]
[conditional]	[radio name="variable_1" value="A B C"] [conditional field="variable_1" condition="(variable_1).is('B')   (variable_1).is('C')"]Question: [text name="variable_2"][/conditional]	Used to show or hide elements based on conditions. Parameter: field, condition Nested conditional statements supported as of 1/7/2023.
[calc]	[text name="variable_1"] <- A [text name="variable_2"] <- B A + B --> [calc value="score1=(variable_1)+(variable_2)" memo="just added"] A + B --> [calc value="score2=(variable_1)+(variable_2);score2>1000?'more than 1000':score2>100?'more than 100':100 or less" memo="interpreted"]	Make calculations from other tags, such as [text], [radio], and [select] Parameters: value, memo, show
[shorthand]	[shorthand name="%sample" value="This is the text that will be repeated."] [textarea name="variable_3"]	Used with [textarea] to insert frequently used text snippets. In the example, if the user types %sample in the text area, then 'This is the text...' will replace that text. Parameters: name, value
[frontload]	[frontload soapnote="shorthand/shorthand-base"]	Brings in the contents of another SOAPnote into the current one. The example imports <a href="https://www.soapnote.org/shorthand/shorthand-base">https://www.soapnote.org/shorthand/shorthand-base</a> into the current SOAPnote Parameter: soapnote
[remark]	[remark]Not seen in the form[/remark]	Text only displays in the markup, not in the active form or output.

An error with a parameter is usually the culprit breaking a form. Parameter 'name' can be letters, underscores, and numbers. It must not have a space and cannot be only a number. Parameter 'show' (used with [calc]) can be true or false (no quotes). Parameters with numbers (size (used with [text]), cols and rows used with [textarea]) also have no quotes. A lot more detail at [www.soapnote.org](http://www.soapnote.org) Version 7 - May 14, 2023
